Grain Market

QUARTERLY SUMMARY AND STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

I.F.A.S. - Univ. of Florida

Washington, D. C. 20250

Volume 7

April 30, 1964

Grain prices generally declined during the January-April period with soybeans and wheat showing the sharpest loss. However, corn was an exception with prices strengthening throughout most of the period. Prices in April for corn, grain sorghum and rye and feed grains on the West Coast were higher than a year ago while wheat prices in April averaged about 12¢ below April 1963. Feed grain stocks on April 1 of 129 million tons, were 6 percent above a year ago. Soybean stocks were at a record high, while wheat holdings were 20 percent below a year ago.

WHEAT ... prices declined around $15 \rlap/c$ per bushel from January to March but in April regained part of the loss due mainly to limited supplies of "free" wheat and also to effects of the new wheat legislation. Hard winter wheat prices in Kansas City in April were 1-2¢ per bushel above the January level but ordinary protein averaged 12¢ below April 1963. Despite the gain in April, red winter and spring wheat averaged 8-12¢ per bushel below January. Durum wheat dropped 13¢ during the 4-month period and in April averaged 33¢ below a year ago. Higher protein wheat sold at premiums averaging around 6¢ per bushel this year as against 11-13¢ last year. Stocks of wheat in all positions on April 1 totaled 1,207 million bushels, the smallest holdings since 1958. Of the total stocks, Commodity Credit Corporation owned 898 million -- 50 million less than a year ago. An additional 141 million were outstanding under support or reseal, leaving around 168 million bushels of "free" wheat. This compares with 263 million at the same time a year ago. Exports of wheat and flour totaled 625 million bushels, July through March, around 200 million more than the same months last season. Flour millings totaled 463 million the first nine months, about 2 percent above the same period a year ago. Canadian stocks of wheat on March 31 totaled 784 million compared with 669 million a year earlier.

RYE ... prices declined steadily the first four months of the year but the average at Minneapolis for the first three weeks of April was 7¢ per bushel above a year ago. Weakness in rye reflected the small exports. Stocks of 10.8 million in all positions April 1 were the smallest since 1953 and 4.4 million below last year. Exports of 1.5 million the January-March quarter were down a third from last year while the 9-month total of 7.2 million were less than half the previous year. Other disappearance continued at about last year's level. Rye stocks in Canada totaled 11.3 million on March 31 as against only 6.6 million a year earlier.

CORN ... prices at the farm, January through March averaged 4¢ per bushel above last year reflecting in part record exports. Market prices, although dipping slightly in February have been advancing gradually during the period and in April were around 5¢ per bushel above a year ago. Stocks of corn in all positions on April 1 totaled 3,264 million -- 226 million more than a year ago. Farm stocks were at a record high but off-farm supplies were 3 percent less than

The soybean supply and distribution table was omitted from the January 27, 1964 quarterly report. However, due to numerous requests indicating a need for such data the soybean supply and distribution table has been reinstated.

Statistics contained in the supply and distribution tables for all grains represent data reported by several independent sources. Production and stocks for the current report are preliminary and subject to revision. No attempt is made to force a balance between supply and reported disappearance.

last year and the smallest since 1957. CCC owned 788 million on April 1 - about the same as last year. However, farmers had put only 376 million under price support by March 31 this year as against 504 million a year earlier. CCC sales of corn the first six months totaled only 114 million compared with 478 million last season. Disappearance of corn the first half of the season at 2,134 million bushels was about 100 million less than last season. Exports of nearly 260 million, the first six months, were a record high, 75 million more than last year. Over 97 million bushels were used for wet milling -- the largest of record. Corn remaining for feed totaled 1,762 million, nearly 200 million less than in 1962-63. Animal units for 1963-64 are estimated at 170.3 million compared with 173.2 million for 1962-63. Feeding of corn per animal unit totaled 10.3 bushels the first half of the season as against 11.3 last year.

OATS ... prices gradually declined the first three months of this year with the April average 3-7¢ below a year ago at Minneapolis and Chicago. Prices at Portland were 5¢ per bushel above a year ago. April 1 stocks totaled 518 million bushels, up 29 million from a year ago, but 7 percent below average. Disappearance, mainly for feed, July through March, totaled 741 million -- 70 million below the same period last year. Exports of around 4 million were only a fifth of those exported the same months last year. Canadian stocks of oats, March 31, totaled 303 million this year as against 281 million last year.

BARLEY ... prices generally declined the first three months of the calendar year. Prices recovered most of the loss in April due in part to good export demand. However, prices in April were below last year in the Midwest but 3-7¢ above on the West Coast. Barley stocks in all positions April 1 totaled 231 million, only 2 million less than a year ago. Disappearance of 322 million bushels, July through March, was only slightly less than last year. Exports of 43 million compared with 50 million a year earlier. Imports were relatively heavy the first 6 months but very light in the past three months. Stocks of Canadian barley, March 31, totaled 200 million -- 60 million above a year ago.

GRAIN SORGHUM ... prices at the farm averaged 5¢ per cwt. higher than a year ago for the first three months of the calendar year. Market prices at Ft. Worth and Los Angeles in April averaged 12-15¢ per cwt. above April 1963. Stocks of 467 million cwt. were 5 million more than a year earlier. Of the total stocks, CCC owned 304 million with an additional 91 million under loan or reseal. Exports of 33 million cwt. the first half of the season were about the same as last season. The quantity remaining for feed at 189 million cwt. was slightly above the year before.

SOYBEAN ... prices at Illinois points during the January-March quarter averaged 10¢ per bushel below the same months last year due to smaller crushing and larger supplies. Prices in April were at about last year's level. Stocks of 376 million bushels on April 1 were the largest of record, 34 million above a year ago. Crushings of 223 million the first six months compared with 249 million the same period last season. Exports of 111 million were 5 million more than last year's record. By the end of March farmers had put 67 million bushels under price support as against 53 million a year earlier.

FIAXSEED ... prices averaged \$3.09 per bushel at Minneapolis the first three weeks of April -- about the same as a year ago. Stocks of flaxseed totaled 24.3 million, an increase of 5.5 million over a year earlier. Exports of flaxseed, July through March, at 2.5 million, were down by nearly a million from the year before. Crushings of flaxseed totaled 13.9 million -- down from the 15.6 million crushed in the same period a year ago. Stocks of flaxseed in Canada on March 31 totaled 13.6 million compared with 9.7 million a year earlier.

^{1/} Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

^{2/} All off-farm storages not otherwise designated.
3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

^{4/} Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

^{1/} Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

^{2/} All off-farm storages not otherwise designated.
3/ Used for brewing, distilling, malt products, and pearling.
4/ Mostly quantity fed, but includes waste, loss, and statistical errors in estimates.

^{1/}Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

^{2/} All off-farm storages not otherwise designated.
3/ Principally alcohol and distilled spirits. Includes allowance for wet-process milling.

^{4/} Mostly quantity fed, but includes other uses, waste, loss, and statistical errors in estimates.

Flaxseed: Supply and distribution, 1957 -64

^{1/} Does not include estimated crushings and exports of new-crop beans in September which were as follows, in million bushels: September 1957-62 average - 6.1; September 1962 - 17.0; September 1963 - 6.5.

^{2/} October 1 stocks in all positions include only old-crop soybeans.

^{2/} Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

^{4/} All off-farm storages not otherwise designated. 5/ Exports minus imports, which are negligible.

^{6/} Mostly quantity fed, but includes waste, loss, and statistical errors in estimates.

Grains: Quantity outstanding under support and owned by CCC compared with total stocks, April 1, 1964 and 1963. (Data in 1,000 bushels except grain sorghum in 1,000 cwt.)

^{1/} Quantity of current crop placed under support minus the quantity of loans repaid.

2/ Quantity of previous crops outstanding under reseal programs.

NOTE: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports and quantity of wheat, rye, soybeans, and flaxseed processed from Census Bureau; and alcohol usage from Internal Revenue Service. January-March 1964 data partly estimated.
